**EYE (SPECIFY)**

Splash proof goggles or face shield

**CLOTHING**

Boots, aprons, or chemical suits should be used when necessary to prevent skin contact.

**ENGINEERING CONTROLS** (SPECIFY, EG. VENTILATION, ENCLOSED PROCESS)

Use local exhaust or dilution ventilation as appropriate to control exposure below permissible levels. Vapors are heavier than air and will collect in low areas.

**LEAK AND SPILL PROCEDURE**

Extinguish all sources of ignition. Provide maximum ventilation. Dike area to contain spill. Take precautions to prevent contamination of ground and surface waters. Recover spilled material using absorbent material such as vermiculite and sweep into closed containers for disposal.

**WASTE DISPOSAL**

Contaminated vermiculite or porous surface must be disposed of in a permitted hazardous waste facility. Recovered liquids may be reprocessed or incinerated in a permitted hazardous waste facility. In all cases material should be disposed of in accordance with all applicable regulations.

**HANDLING PROCEDURES AND EQUIPMENT**

Keep container closed when not in use. Store only in closed, properly labeled containers. Store as VERY FLAMMABLE LIQUID. Store in a cool, dry, well ventilated area away from heat sparks and open flames. Treat empty containers as containing hazardous residues.

### ADDITIONAL INFORMATION
